

Climate change is pressing the green economy to do its magic to deliver sustainable growth, but this transition will not be automatically achieved through technology and economics alone. Instead, the green transformation requires political nudge, coupled with education, research & development and inculcation of Green culture.

This week's Green Pulse will showcase some activity within and outside of the company. Happy Reading!

The Experience of Green Energy Office (Geo) Building

The students of Taylor's University visiting GreenTech Malaysia.

On 28th May 2018, GreenTech Malaysia received a visit from Taylor's University, School of Engineering students. The 21 students majoring in Mechanical Engineering were accompanied by lecturer, Ms. Noor Zafirah Abu Bakar.

Students expectation of the visit was to learn about the building structure of the first Green Energy Office (G.E.O) building and GreenTech Malaysia.

Madam Freida Razali, Senior Manager, Strategic Communication gave a briefing to the students about GreenTech Malaysia's products, services, building design and structure, and green practices. Students were also given an overview of the Green Technology Master Plan and briefing on electric mobility.

During this half day visit, students have gained knowledge and exposure regarding green technology, products and services through the briefing, tour of the G.E.O. building and an unforgettable experience riding the fleet of electric vehicles.

Students test drive 'Tweezy'.

ISO 9001:2015

kick starts at GreenTech Malaysia

As a driver of the national green agenda encompassing green economy, green technology, and green culture, GreenTech Malaysia realizes the importance of having a common set of rules, processes and procedures within the organisation especially now that we have completely close all our audit challenges, successfully.

The journey towards ISO 9001:2015 Certification requires an increased involvement and effort by all members of GreenTech Malaysia pertaining to development, implementation and monitoring of the Quality Management System. This process involves the setting-up of the Quality Policy, Quality Goals and Quality Objectives for various functional units by top management in consultation with the respective departmental staff.

GreenTech Malaysia implemented the new SOP in line with the ISO 9001:2015 Certification on 1st of June 2018. With this Certification, we are in a better position to execute our mandate with more enthusiasm and focus on excellent service delivery. The success of this ISO Certification depends on the company's full commitment to put ourselves in a better position in terms of corporate governance, transparency and efficiency.

Presentation by Ms Freida.

Briefing on the decompost machine

Student test drive Electric Vehicles

ChargEV station coming to the Land of the Eagles (Langkawi)

GreenTech Malaysia is in the early stage to install 30 chargEV station in Langkawi island, under the GEF5-UNIDO "Energy-Efficient Low-Carbon Transport project". This initiative is part of chargEV expansion besides to promote the use of electric vehicles, in particular, electric taxi in the island. For that, GreenTech Malaysia is working closely with Langkawi District Office to get premise owners in the island to take up the charging station. The first chargEV station has been installed at Langkawi Fair Shopping Mall.

With Kedah's Green Agenda and Langkawi to be designated as a low carbon island as well as a popular tourist destination; green facilities would certainly boost its appeal. The local taxi owner in Langkawi would also benefit from this program as they would be able to adopt new technology (electric vehicle) to replace existing conventional vehicle as taxi. Lower operating cost (fuel and maintenance saving) ensure that the taxi drivers will be able to earn extra income whilst contributing to save the environment.

Besides Langkawi Fair Shopping Mall, phase one of the chargEV installation will be at Langkawi Geopark, Adya Hotel, Langkawi Parade, Petronas Station Quay (Pantai Kok), Aseania Resort and Langkawi Hospital.

Discussions on ChargEV Stations in Langkawi.

ChargEV Stations

To invest To understand & To collaborate

The exploration meeting was to share about the various products and services offered by MGTC. Discussion was also on identifying collaboration initiatives for the development of the five core industrial clusters in Selangor which are Electrical & Electronics, Life Sciences, F&B Manufacturing, Transport Equipment, Machinery & Equipment. Invest Selangor is also keen to see how MGTC can assist with promoting green for its Selangor Industrial Park.

Meeting was led by Madam Elina Jani, Chief, Strategic Communications from MGTC. Other representatives from MGTC were Aneita Pandian Abdullah, Head of Communications and Freida Razali, Senior Manager, Strategic Communications.

Representatives from Invest Selangor: Noor Azfina Ishak, Director Trade & Investment Division; and Sharifah Norfazera, Assistant Manager, Trade & Investment Division.

To learn or not to learn that is the question

May 31, 2018, MGTC - In 2016, MGTC participated in the Asia School of Business' (ASB) Action Learning Projects as a host organisation. The Action Learning Projects is a part of ASB's Masters of Business Administration (MBA) curriculum. Organisation's (or partners) become hosts to 5 five students MBA students. Students would work on a specific project for the organisation and the outcome produced will be presented in the Action Learning Symposium. Benefits to organisations participating in this Action Learning Projects: Able to obtain new and fresh ideas, exposure to theory and frameworks for internal staff, economic value, education and access to talents with no monetary cost involved.

Ms Elina Jani, Chief of Strategic Communications in discussions with ASB reps.

Meeting was led by Madam Elina Jani, Chief, Strategic Communications from MGTC. Other representatives from MGTC were Wan Faizal, Head of Technology & Innovation, and Freida Razali, Senior Manager, Strategic Communications.

Representatives from Asia School of Business were Mr. Sarma Subramonia, Director of Action Learning; and Mr. Jefri Zaini, Deputy Director of Action Learning.
